

CEE Market Insights

Market outlook

Regional currencies were driven by external factors amid dampened global rate expectations. In Hungary, as the central bank may perceive that external developments could justify a loose policy, and local inflation was also not above expectations today, the forint is unlikely to have much room to soar further. The Czech koruna may not weaken much after the recent uptick, unlike the forint, as the central bank has a different approach there. Stability or slight appreciation is most likely for the koruna in the coming months. For the Serbian dinar, moves were not very strong, but central bank intervention was very intensive to fend off appreciation, stemming from inflows. We expect the NBS to stand ready to keep the currency relatively stable.

Yield spreads over German Bunds mostly declined further in CEE. The most dramatic decline took place in Serbia, where longer-dated yields fell by approx. 50-60bp w/w. While profit-taking after such a move could be reasonable, we see further potential of Serbian longer-dated yields to go down. We changed our forecasts in Hungary: after the recent decline in yields, an upward move by the year-end could only reach around 3% in the 10Y segment. For Poland, we now expect only a marginal increase to 2.55% until the end of 3Q19, with risks to the downside if German yields continue going down.

Looking ahead this week:

Monday	Tuesday	Wednesday	Thursday	Friday
SK, SI: Industry RO: Trade Balance	CZ: CPI	RO, RS: CPI SK: Wages	RO: Current Account, Industry PL: Trade Balance	SK, PL, HR: CPI

Hungary and Poland are the only two CEE countries that have already published their May inflation figures; the rest should publish their CPI numbers next week. Similarly to Poland and Hungary, in most cases we expect inflation to halt or even slightly moderate. This is the case for Croatia, the Czech Republic and Serbia. In Romania, inflation is expected to inch up to 4.2% (from 4.1%), while inflation is to increase in Slovakia, thanks to energy and services price increases. Industrial output data for April is due next week for Slovakia, Slovenia and Romania. We expect rather benign growth, as production has been negatively affected by the Easter holidays. Next week, the European Commission is to release its assessment of Convergence/Stability Programs; some Euro Area members could face the risk of being put under the Significant Deviation Procedure for breaching the preventive arm of the SGP (lack of convergence towards MTO), or even under the Excessive Deficit Procedure (due to the lack of debt reduction). So far, only Hungary and Romania have been under the Significant Deviation Procedure, among all EU member countries. Tonight, Fitch Ratings is likely to upgrade Croatia's rating to investment grade.

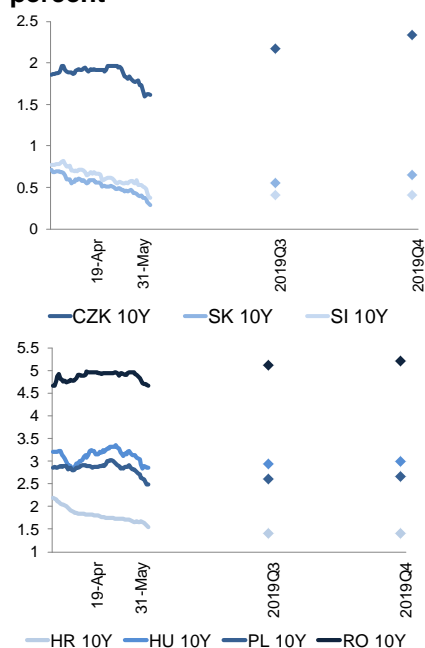

In case you missed it last week...

- HU: Inflation remained unchanged at 3.9% in May
- PL: No change in rates, stability of rates is still most likely scenario
- PL: Flash estimate of May inflation arrived at 2.3%, slightly below market and our expectations
- SK: Real GDP growth was confirmed at 3.7% y/y in 1Q19; growth was fueled by investments
- RO: Real GDP increased by 5% y/y in 1Q19, household consumption remained main contributor to growth
- RS: Central bank left key rate at 3%

On global markets:

Next week, important data from the US will be released. CPI is of course important for the Fed, but at the same time unlikely to show any significant change. Retail sales numbers for May have more potential to move the EURUSD. The impact from highly volatile equity markets in May is unknown and poses downside risks for the release.

CEE currencies:

Regional currencies were driven by external factors amid the worsening of the global growth outlook and dampened rate expectations. Currency appreciation was strongest on markets where yield and rate declines on longer tenors were not as large (i.e. Czechia, Hungary) as elsewhere (i.e. Poland, Romania). In Hungary, as the central bank may perceive that external developments could justify a loose policy, and local inflation was also not above expectations, the forint is unlikely to have much room to soar further. (Another big question is if very strong domestic price pressures could be tamed by external developments – this still remains to be seen in Hungary, in our view.) The Czech koruna finally got a boost, after ailing in the last few weeks, given the lowered rate outlook. The koruna may not weaken much after this move, unlike the forint, as the central bank has a different approach there. Stability or slight appreciation is most likely for the koruna in the coming months. For the Serbian dinar, moves were not very strong, but central bank intervention was very intensive to fend off appreciation, stemming from inflows. The situation may remain tense for the NBS to keep this up, as the policy rate was not cut, despite inflows. Still, we expect the NBS to stand ready to keep the currency relatively stable.

CEE rates and yields:

Rates and yields further declined substantially in CEE last week against the backdrop of easing external growth prospects. Additionally, yield spreads over German Bunds declined further as well. The most dramatic decline in yields took place in Serbia, where longer-dated (above 8Y) yields fell by approx. 50-60bp w/w. Interventions from the central bank to tame inflows also intensified, while the bank itself said that inflation is under control. However, despite this statement and currency developments, the NBS kept the policy rate unchanged this week. While some profit-taking after such a yield drop could be reasonable, we see further potential of Serbian longer-dated yields to go down to around 4%. In addition, we changed our forecasts in Hungary: after the recent decline in yields, an upward move by the year-end could only reach around 3% in the 10Y segment. Domestic pressures are very strong in Hungary, however, so yields are unlikely to stay too low for very long. Polish yields also declined strongly, as the 10Y now prints below 2.5%. We now expect only a marginal increase to 2.55% until the end of 3Q19 and to 2.65% until the end of the year, with risks to the downside if German yields continue going down. As the short end of the Polish curve is much more stable, the flattening of the curve could be more and more visible.

Calendar

Time	Country	Indicator	Period	Survey	Erste Est.	Prev.	Pre Comment
10-Jun							
	SK	Industrial Production (y/y)	Apr		3.5%	7.3%	Industrial production will likely be affected by timing of Easter this year, although new car plant is still providing some extra boost to IP figures.
8:00	RO	Trade Balance	Apr		-1.2	-1232.1	Imports are growing fast, while exports of goods are affected by weaker external demand and competitiveness issues faced by local manufacturing.
10:30	SI	Industrial Production (y/y)	Apr		2.8%	2.8%	Industrial production maintaining positive footprint, though with somewhat decelerated growth rate, amid high base effect
11-Jun							
9:00	CZ	CPI (y/y)	May	2.7%	2.7%	2.8%	Due to tight labor market, sound domestic demand and pro-inflationary development in food prices, headline inflation remains above target. However, it has been gradually decreasing, which in turn implies that CNB does not need to react in coming months.
9:00	CZ	CPI (m/m)	May	0.4%	0.4%	0.1%	In m/m terms, inflation was affected by increase in food prices. In fact, food prices pose risk for near future, as many important food items are relatively volatile and their future development cannot be easily predicted. This is also affected by weather conditions.
12-Jun							
8:00	RO	CPI (y/y)	May	4.13%	4.15%	4.11%	Inflation to remain above NBR's target in coming quarters.
8:00	RO	CPI (m/m)	May		0.52%	0.61%	
9:00	SK	Wages (y/y)	Apr			3.4%	
12:00	RS	CPI (y/y)	May		2.7%	3.1%	We expect gradual decline of CPI prints, as surge in vegetable prices no longer exhibits strong base effect.
12:00	RS	CPI (m/m)	May			0.7%	
13-Jun							
	RO	Current Account Balance	Apr			-1212	
8:00	RO	Industrial Production (y/y)	Apr		0.2%	1.4%	Weak industrial production growth due to sluggish external demand.
14:00	PL	Trade Balance	Apr	434		589	
14-Jun							
9:00	SK	CPI (y/y)	May		2.6%	2.3%	Inflation is likely to have been driven by food, energy and service prices.
9:00	SK	CPI (m/m)	May		0.3%	0.2%	Some acceleration in rate of inflation is expected for May.
10:00	PL	CPI (y/y)	May F	2.3%	2.3%	2.3%	May inflation figure is expected to be confirmed.
10:00	PL	CPI (m/m)	May F	0.2%		0.2%	
11:00	HR	CPI (y/y)	May		0.7%	0.7%	Inflation movements remain in tight band, i.e. slightly below 1% mark.
11:00	HR	CPI (m/m)	May			0.6%

This publication does not constitute or form part of, and should not be construed as, an offer, recommendation or invitation to subscribe for or purchase any securities, and neither this publication nor anything contained herein shall form the basis of or be relied on in connection with or act as an inducement to enter into any contract or inclusion of a security or financial product in a trading strategy. Information provided in this publication are based on publicly available sources which Erste Group considers as reliable, however, without verifying any such information by independent third persons. While all reasonable care has been taken to ensure that the facts stated herein are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, Erste Group (including its representatives and employees) neither expressly nor tacitly makes any guarantee as to or assumes any liability for the up-to-dateness, completeness and correctness of the content of this publication. Erste Group may provide hyperlinks to websites of entities mentioned in this document, however the inclusion of a link does not imply that Erste Group endorses, recommends or approves any material on the linked page or accessible from it. Neither a company of Erste Group nor any of its respective managing directors, supervisory board members, executive board members, directors, officers of other employees shall be in any way liable for any costs, losses or damages (including subsequent damages, indirect damages and loss of profit) howsoever arising from the use of or reliance on this publication. Any opinion, estimate or projection expressed in this publication reflects the current judgment of the author(s) on the date of publication of this document and do not necessarily reflect the opinions of Erste Group. They are subject to change without prior notice. Erste Group has no obligation to update, modify or amend this publication or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. The past performance of securities or financial instruments is not indicative for future results. No assurance can be given that any financial instrument or issuer described herein would yield favorable investment results or that particular price levels may be reached. Forecasts in this publication are based on assumptions which are supported by objective data. However, the used forecasts are not indicative for future performance of securities or financial instrument. Erste Group, its affiliates, principals or employees may have a long or short position or may transact in the financial instrument(s) referred to herein or may trade in such financial instruments with other customers on a principal basis. Erste Group may act as a market maker in the financial instruments or companies discussed herein and may also perform or seek to perform investment services for those companies. Erste Group may act upon or use the information or conclusion contained in this publication before it is distributed to other persons. This publication is subject to the copyright of Erste Group and may not be copied, distributed or partially or in total provided or transmitted to unauthorized recipients. By accepting this publication, a recipient hereof agrees to be bound by the foregoing limitations.
